

Architect Enterprise Resilience

iServer365: Driving Agility, Clarity and Reliability

Resiliency is an Orchestrated Exercise

A truly resilient business is aligned on shared vision and strategy. They have a current understanding of the organization's context, and can nimbly adapt and respond to change. Too often, organizations lack the ability to address business and technology resiliency in a strategic, comprehensive and integrated manner across lines of business. iServer365 is a single source of truth for your enterprise technology, supporting collaboration across business, process, information, application, technology and risk domains.

Enterprise Architecture

Unite Business and IT to architect your digital future

Business Process Analysis

Optimize business performance with cross-functional process analysis and design

Governance, Risk and Compliance

Manage IT governance and risk while ensuring business regulatory compliance

Strategic Portfolio Management

Make faster, smarter strategic decisions

New Collaboration Tools For Changing Workflows

Orbus' iServer365 platform flexes to your organization's requirements and aligns teams, risks, and insights to improve business resilience.

Here are some of the reasons why more than 600 global blue-chip enterprise and government clients choose Orbus.

Simpler and faster time to sustainability

Get up and running with familiar Microsoft tooling, pre-built visualizations, meta-models and integrations.

- Shorten the learning curve with native Microsoft integrations for Office, Visio, and PowerBI.
- Easily integrate data from core business systems such as ServiceNow, Flexera and Jira.
- Choose from a library of configurable dashboards, built specifically to EA, BPA, GRC, SPM industry standards.
- Extend Orbus out-of-the-box meta-model and customize attributes with minimal development effort.

“Bringing in a tool like iServer enables us to articulate the capabilities we have across the business, we can highlight where opportunities lie.”

Andrew Kiely, Head of Domain Architecture, Three

iServer365 is a very powerful tool for helping to guide the business at a strategic level.

Andrew Wright, CIO, Bulla

“Having one source of truth gives us great visibility so everyone knows what they're doing. It plays a foundational role in digital transformation.”

Brian Hoffman, Chief Enterprise Architect, Kellogg's

“We need to understand all the different parts of the business...iServer365 is the perfect tool for doing that.”

David Merfield, Lead Enterprise Architect, Yorkshire Building Society

Make more collaborative and informed decisions

Manage the complexity and context of your Enterprise with an integrated process, information, and technology architecture.

- Collaborate, monitor, manage, and scale your end-to-end technology strategy. Share visualizations, dashboards and artifacts with key stakeholders through Microsoft Teams.
- Bridge strategy to execution by assessing the health of your business capabilities layer.
- Quickly respond to change with “as-is” and “to-be” scenario planning. Visualize the 10,000 foot view of your business, as well as the critical details.

Smarter strategy, long term results

Manage and rationalize your application portfolio to align with your strategy.

- Use structured insights to de-risk each milestone on a transformation or cloud migration journey.
- Maximize sustainability by repeating vs. reinventing processes. Minimize risk through transparency and documentation.
- Gain clarity on the investments, dependencies, and use of tech across your IT portfolio. Identify duplicative tooling, opportunities for consolidation.

iServer contains valuable, trusted information which helps us to make the right decision faster.

Marcel Grossert, Global Enterprise Architect, Novartis

“Return on Investment (ROI) has been swiftly realized, we can already identify strategic business impacts easily using iServer's Impact Analysis Visualization.”

Ahmad Alhaddad, Senior Manager, DP World
