

# GDPR Accelerator

Achieve all-important compliance and avoid hefty fines

## Why the GDPR Accelerator?

- Enables compliance professionals to expedite the GDPR initiative and avoid financial penalties
- Helps business stakeholders achieve an all-round view of the customer
- Reassures management by fostering a proven, systemized approach to the GDPR compliance initiative

## What Does it Offer?

The GDPR Accelerator is a comprehensive toolkit designed to guide organizations as they outline and implement a structured path towards compliance. Instead of wasting time and resources building a strategy to answer the Regulation requirements from scratch, you can opt to receive iServer already aligned to a framework based on ICO's recommendations. The framework together with the tools enable users to quickly identify an organization's data flows and develop a strategy addressing vulnerabilities.

# GDPR Accelerator

## Features

### Proven Methodology

Achieve compliance by following a proven methodology developed in accordance with the Information Commissioner's Office official guidelines.

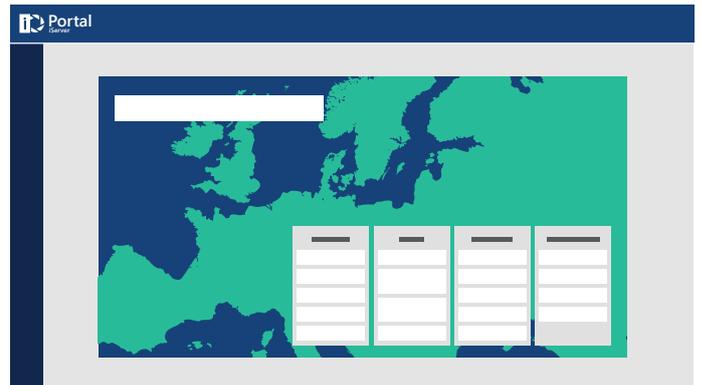

### Preconfigured Compliance Templates

Access to a set of templates for each organizational stream including Data Lineage Model, Data Lifecycle Management Model, Information Security Policy and others.

### Comprehensive Dashboard Set

iServer is delivered with a comprehensive set of dashboards to support key compliance stakeholders, e.g. the Data Protection Officer.

### Integration Capabilities

Built-in meta-model extension to existing standards and frameworks such as TOGAF, ArchiMate and BPMN.

### Predefined Attributes

iServer has a predefined set of attributes that can be used to capture GDPR information in the repository.
