

TOGAF® 9: Stakeholder Management: Selecting the Right Views for C-Level Buy-in

THE *Open* GROUP
Making standards work®

The C-level Stakeholder

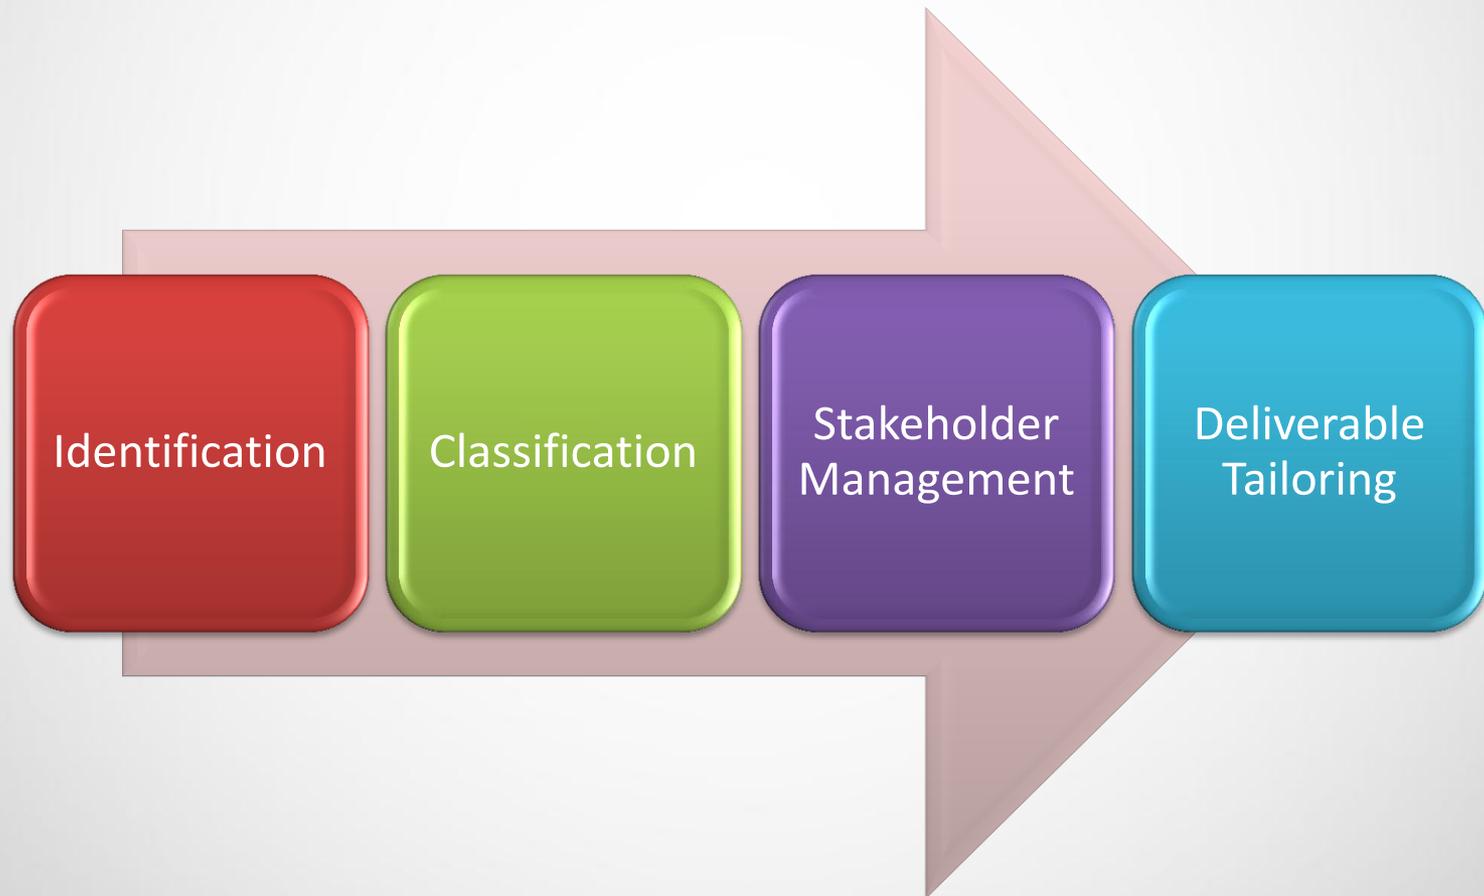

*“Business professors too often forget that executive decision makers are **not fact collectors**; they **are fact users and integrators**. Thus, what they need from educators is help in understanding how to interpret facts and guidance from experienced teachers in making decisions in the absence of clear facts.” **

*Most EA professionals are [arti]**fact collectors**, and they engage the executive team from that **perspective!***

*Extract from the Harvard Business Review article; How business schools lost their way (published May2005, Vol. 83 Issue 5, Bennis, Warren G., O'Toole, James)

The Stakeholders Management Process

The Open Group's TOGAF® 9 architecture framework can be used by EA teams as an input to defining their own stakeholder management process.

Classify Stakeholder Positions

C-level executives and other C-level managers have different responsibilities within the organization and it is important to understand their spheres of control.

Determine Stakeholder Management Approach

TOGAF® 9 Communication Plan

Table of Contents

- 1 Document Purpose
- 2 Stakeholders
- 3 Communication Requirements
 - 3.1 Overview
 - 3.2 Managerial Approach
- 4 Communication Mechanism
 - 4.1 Events
 - 4.2 Channels
 - 4.3 Formats
 - 4.4 Content
- 5 Communication Timetable
 - 5.1 Key Activities and Associated Milestones
 - 5.2 Duration, Effort and Resources

Try the following alternative Prince2 Communication Management Strategy doc as an alternative option:

<http://office.microsoft.com/en-us/templates/prince2-communications-management-strategy-project-management-TC030009473.aspx>

I am using the new TOGAF® 9 Communications Plan deliverable template as a basis for developing my stakeholder management approach.

Tailor Engagement Deliverables

The stakeholder management approach includes all the criteria needed to create custom views and very specific deliverables for C-level executives.

[It is always better to start with a generic viewpoint and then customise it for your audience.

This is especially true for C-Level executives for which you want to base views generated by a viewpoint that is proven in the market, while also customising and changing it to address their concerns.]

I selected the three TOGAF® 9 viewpoints that I believe are the most appropriate for C-Level executives..

Example of a Business Footprint diagram

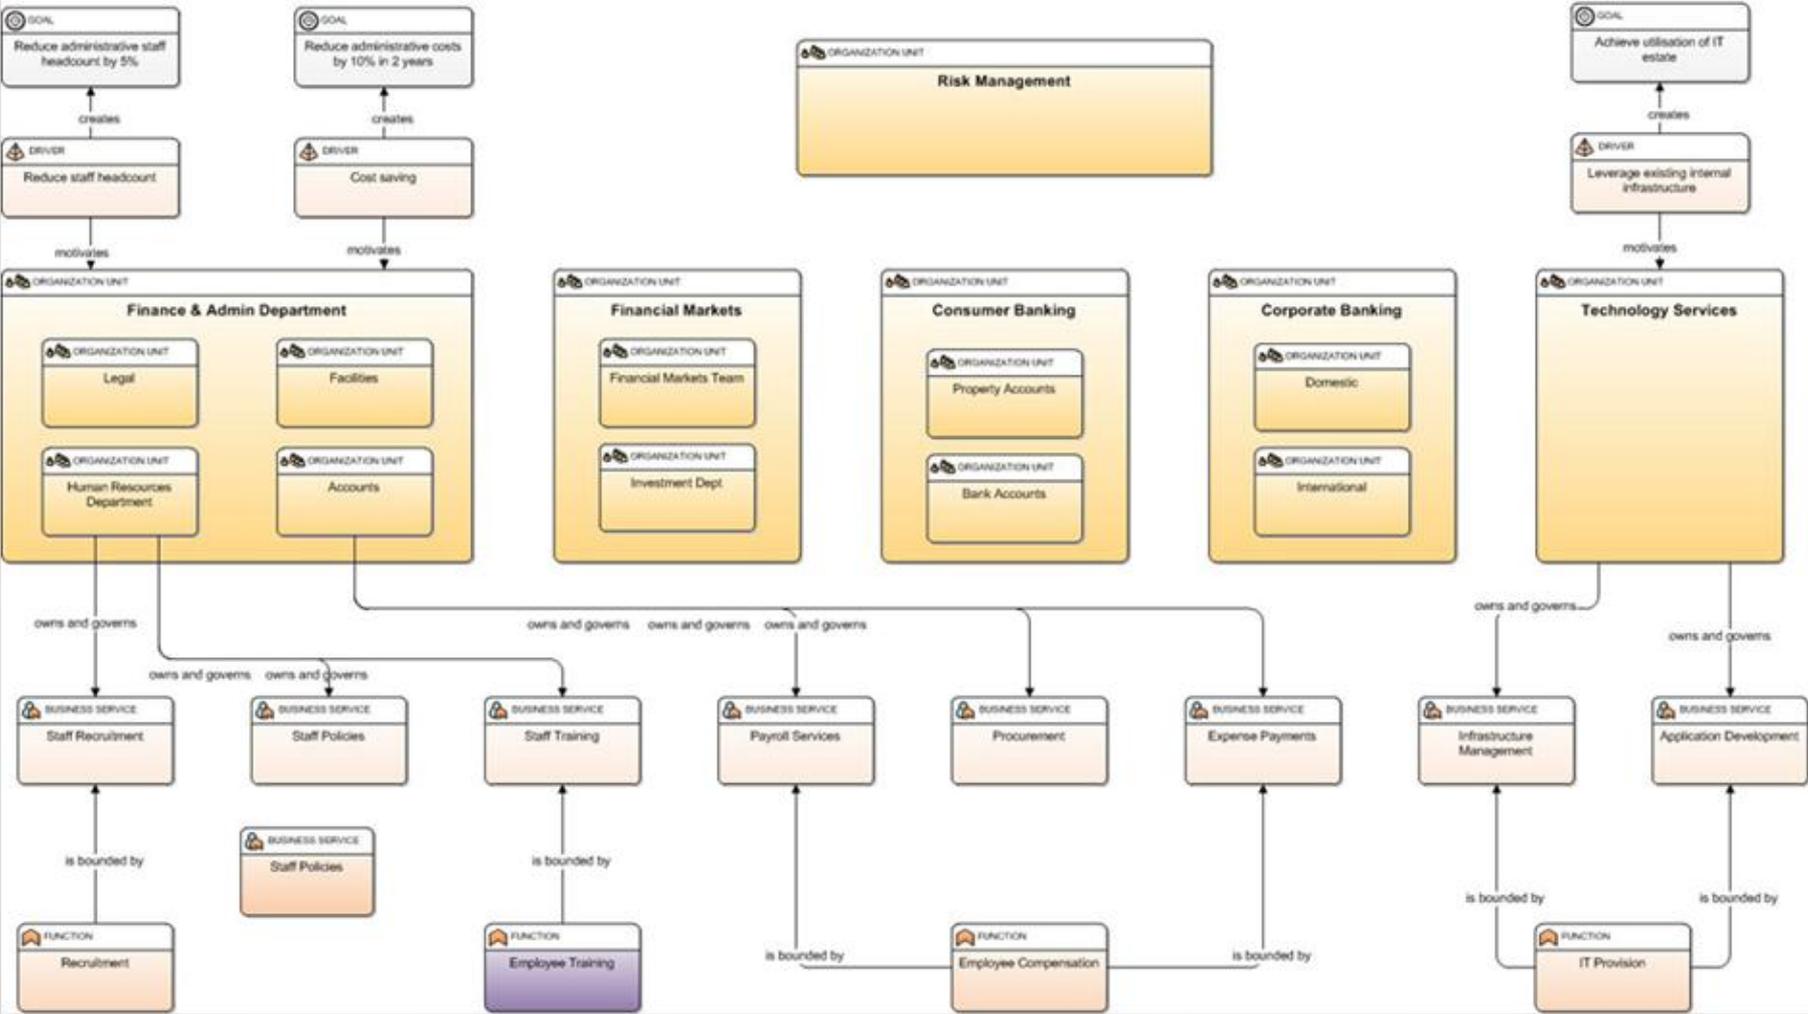

MTT Business Footprint Diagram

Type: T9 B Business Footprint Diagram

Description

Version: v1

Alternative TOGAF® Viewpoints to consider

MODAF Views to consider:

- AV-1 :Overview & Summary Information
- StV-1 : Enterprise Vision
- StV-2 :Capability Taxonomy
- StV-3 :Capability Phasing
- OV-1a :High-Level Operational Concept Graphic
- OV-1b :Operational Concept Description
- OV-1c :Operational Performance Attributes
- AcV-1 :Acquisition Clusters
- AcV-2 :Programme Timelines

ArchiMate Views to investigate:

- Organization Viewpoint
- Business Function Viewpoint
- Business Process Viewpoint
- Product Viewpoint
- Landscape Map Viewpoint
- Layered Viewpoint

Alternative views from **TOGAF®**:

- Standards View
- Organization/Actor/ Location
- Application & User Location View
- Process Flow
- Business Use-case
- Environments & Locations View
- Service/Information Events
- Service-Information View
- Functional Decomposition
